

Menu programmable CNC milling machine

Art. Nr.: 5 29 60

For milling of transoms, cross bars for straight, angled and arched profile joints, as well as for negative curves. Simple controls with unlimited connecting combinations.

Options:

- Milling tools according to profile system

Application:

- 90° milling
- Angled milling
- Positive radii
- Negative radii (down to the minimum milling diameter)
- Curve transition (Arch or other transitions)
- Straight profile joints
- Curved profile joints
- Sun bars

Your Advantages:

- Milling of any radii, angles, straight or angled sections and negative radii
- Entry of just a few dimensions using the menu
- Use of left and right-running diamond-grinding milling tools for optimum milling results.
- Simple handling and short change-over times
- Large milling range, 275mm wide and 600mm long
- Pneumatic profile clamping
- Suction points for the connection of chip suction equipment
- Quick milling blade change via quick pneumatic clamp system

We reserve the right to modify the product in the interest of technical improvements.

Technical Data:	• Milling Motor:	2.2 kW
	• RPM:	5.220 1/min.
	• Air Pressure:	6 – 8 bar
	• Air Use per cycle:	0.5 Ltr.
	• Voltage:	400 V
	• Power:	8 A
	• Total power usage:	4.0 kW
	• Size of milling spindle:	32 mm
	• Max. milling height:	130 mm
	• Maximum milling diameter:	125 mm
• Size of Suction points:	80 mm
